

Dear Customer

Within the last years we have developed **newly control, cooling and calibrating systems** which have established firmly in the market. Besides we are continuously working on further innovative equipment.

The combination of gauge control system VARIOcool and high-performance air ring KARAT stands for a consequent optimisation of quality and performance.

Compared to other systems, the patented gauge control system VARIOcool achieves outstanding results in output, flexibility, efficiency and response time.

The KARAT air ring meets all requirements for a modern high-performance air ring and sets new benchmarks in many ways.

Patented calibrating solutions demonstrate the innovative strength of our company.
